Overview

StableFlow is outsourcing IT Company providing professional **Web and mobile development services**. Our office is located in the South-Eastern Europe - Kharkiv, Ukraine.

We specialize in custom **web design and development, iPhone and Google Android mobile applications development, website hosting and support, providing effective outsource development teams**.

The technologies and platforms we widely use and promote are: **ASP.NET, PHP, Flash, iPhone, Google Android**.

We are aimed to building strong and long-term relations in the areas of **custom web and mobile development, data and content management systems, project management and technical support**.

Since foundation of the company in 2008 and start of work on software development market we completed dozens of successful projects for small and large companies from all over the world. From the very beginning our mission was to provide our clients professional, customized solutions that bring tangible and measurable results, help grow their business and promote their brand. We treat each particular project with individual approach and our experience allows us to choose and propose best solutions, therefore our clients have always been receiving solutions that justify their expectations and investments. Most of our clients continue collaboration with us investing in new projects. It is very important for us as we want to be a reliable partner who never let client down and can always be trusted.

Our team and knowledge are constantly growing and by nowadays our staff involves over 20 professionals who keep up with most up to date technologies, tools and development methods.

What we can offer

We engage professional, qualified team members to cover wide range of IT services and provide best solutions in user interface design, software development and effective marketing. With experience in analysis, technical specifications writing, development and design from scratch, websites revamping, and work with a large number of APIs and 3-rd party software, our team can implement any tasks from simple scripting or logo creation to complex projects designed for large audience.

You are always welcome to order complete package of services or only part of them depending on particular business needs. Separate proposal is to provide dedicated team of professionals with required skills.

Services we deliver:

- **Website Design and Development**
- **Social Networking**
- **Website Hosting and Support**
- **Mobile Application Development**
- **Outsource Development Teams**

Our departments

- **ASP.NET Development**

Group of experts, who started working with this technology from the earliest version 1.1 till up to date.

- **PHP Development**

Professional PHP developers with 3+ years experience in development of custom websites and applications based on LAMP platform.

- **iPhone Development**

Well-educated, customer focused professionals with strong knowledge of Mac OS X, Objective-C, Xcode, iPhone OS.

Work options

Our work options are:

- **Fixed price per project.** Cost will be determined basing on resources involved in a project, quality of initial project description and technical specification availability (can be prepared on our side).
- **Work on hourly basis.** This option implies work on project for particular period of time as per provided estimate.
- **Dedicated developer or development team.** Dedicated developers are developers you can hire for at least 1 month. Thus they are available for work on your projects each day for 8h per day.

Payment terms

There are at least three types of payment options we recommend to clients:

- First option applies to small tasks and projects. It implies initial payment of 30% from project's budget and remaining 70% upon completion but before upload to client's server.
- Second option applies to middle and large size projects. It implies payments to be split into portions that equal to number of project milestones (stages) and charges to be done upon completion and approve of each particular milestone.
- Third option is applicable to a dedicated team working on long-term projects; in this case payment is received after a certain period of time.

Payment options are always discussed to find optimal solution for each particular client.
